Innovative Santos FUELS issue closes oversubscribed

Santos Limited (Santos) is pleased to advise that the FUELS capital management program announced last month by the Company has closed oversubscribed, raising \$600 million.

Funds raised by the issue of the franked, unsecured, equity-listed securities (FUELS) will be used in the \$350 million redemption and buyback of existing Reset Convertible Preference Shares (Resets) and for capital expenditure on the Company's expanding oil and gas interests.

Santos broke new ground on 24 August 2004 when the FUELS capital management initiative became the first step-up security issued by an Australian corporate to be combined with a redemption and buyback rollover option.

"The buyback and redemption of the Resets has been completed and Santos has accepted a further \$100 million worth of subscriptions for FUELS," the Company's Chief Financial Officer, Mr Peter Wasow, said today.

"We have therefore allotted a total of 6 million FUELS with a total value of \$600 million compared with the indicative Prospectus offer to raise \$500 million," he said.

"It is a most pleasing response to our offer, in particular the outstanding rollover of more than 85% of Resets into FUELS by Reset holders."

"We appear to have hit a 'sweet spot' in the market where high demand and a lull in new issuance is reflected in tight pricing," he said.

Allocation details for the issue of FUELS pursuant to the Prospectus dated 1 September 2004 are set out below.

Eligible Reset Holders

As outlined in the prospectus, Eligible Reset Holders validly choosing to either Redeem and Reinvest in FUELS (Option 1) or Sell Resets on-market and Reinvest in FUELS (Option 2) have had their Resets proceeds reinvested into FUELS. Any Resets funds not reinvested in FUELS (including remainder monies due to reinvestment elections not necessarily resulting in multiples of \$100) will be refunded.
