Santos strikes another gas supply contract with Wesfarmers Chemicals, Energy & Fertilisers

Santos today announced that it had entered a second contract to supply natural gas to the Wesfarmers Chemicals, Energy & Fertilisers (WesCEF).

Under the agreement, Santos will supply up to 34 PJ of gas to WesCEF over 4 years.

It follows an agreement last month to supply approximately 28 PJ of gas to WesCEF over 3 years.

Santos Executive Vice President, Marketing and Trading, Philip Byrne, said this latest contract reinforced Santos' position as a major producer of domestic gas in the Western Australian market.

"We produce only domestic gas in WA and it's a business we are keen to grow, delivering affordable and reliable energy to local businesses and industry," he said.

"This contract also strengthens our relationship with WesCEF and highlights the quality of our client base."

Santos is an Australian company with a number of domestic gas exploration and production assets in WA, including the John Brookes, Halyard/Spar and Reindeer offshore gas fields in the Carnarvon Basin and gas processing plants at Devil Creek and on Varanus Island.

Ends.
