

Third Quarter Activities Report

For period ending 30 September 2019

ASX: STO | ADR: SSLZY

Santos

17 October 2019

Record quarterly production and sales volumes

- Third quarter production of 19.8 mmboe was a record for Santos and 32% up on the corresponding quarter
- Production was 7% higher than the second quarter with higher production from all Australian assets
- Record sales volumes of 25.2 mmboe were 25% higher than the corresponding quarter
- Sales revenue of \$1,030 million was the second highest quarterly revenue on record

Dorado appraisal success

- Well tests confirmed the field is capable of producing flow rates at the higher end of pre-drill expectations
- The oil test rate of 11,100 barrels per day (facilities constrained) was one of the highest ever from a North West Shelf appraisal well test
- Well test results supportive of FEED-entry in early 2020

Strong free cash flow

- Santos generated \$214 million in free cash flow in the quarter, bringing total free cash flow for the nine months to \$852 million

Acquisition of ConocoPhillips' northern Australian interests announced

- On 14 October, Santos announced the acquisition of ConocoPhillips' interests in Northern Australia for US\$1.39 billion plus a contingent \$75 million on Barossa FID¹
- Value accretive acquisition of operating interests in long-life, low cost natural gas assets and strategic LNG infrastructure consistent with Santos' core asset growth strategy
- Fully-funded from existing cash resources and new committed debt

Santos Managing Director and Chief Executive Officer Kevin Gallagher said it was another strong quarter for Santos, highlighted by record production and sales volumes, and the second highest quarterly sales revenue on record.

"Santos continues to generate strong free cash flows from the consistent application of our disciplined operating model."

"Another highlight of the quarter was the successful appraisal of the Dorado field which is one of the most exciting growth projects in our portfolio. Following the strong well test results, we are targeting FEED-entry in early 2020."

"The acquisition of ConocoPhillips' northern Australia interests announced earlier this week delivers shareholders operatorship and control of long-life, low cost natural gas assets and strategic LNG infrastructure aligned to our brownfield growth strategy. Santos is keen to work with our joint venture partners to achieve alignment to support our Barossa development and to facilitate the future development of the vast discovered resources offshore and onshore Northern Territory."

"This value accretive acquisition will also further reduce our free cash flow breakeven oil price and strengthen our offshore operating and development expertise to drive growth across northern and Western Australia where we have a significant existing resource position," Mr Gallagher said.

¹ The acquisition is subject to third-party consents and regulatory approvals.

Comparative performance

Santos share	Units	Q3 2019	Q2 2019	Change	2019 YTD	2018 YTD	Change
Production	mmboe	19.8	18.6	7%	56.8	43.0	32%
Sales volume	mmboe	25.2	22.4	13%	70.4	58.3	21%
Ave. realised oil price	\$/bbl	70.20	79.22	-11%	71.37	77.10	-7%
Sales revenue	\$million	1,030	959	8%	3,004	2,653	13%
Capital expenditure ¹	\$million	268	270	-1%	715	487	47%

¹ Capital expenditure including restoration expenditure and acquisition of exploration assets but excluding capitalised interest.

Sales volumes (Santos share)

Product	Unit	Q3 2019	Q2 2019	Q3 2018	2019 YTD	2018 YTD
LNG	000 t	731.9	714.6	738.6	2,214.5	2,011.8
Domestic sales gas & ethane	PJ	77.5	64.3	55.7	207.3	161.9
Crude oil	000 bbls	3,553.4	2,666.2	2,296.7	9,117.2	7,594.5
Condensate	000 bbls	1,127.2	1,261.7	1,063.3	3,687.6	2,952.9
LPG	000 t	37.8	77.5	41.3	132.6	106.6
Sales						
Own product	mmboe	19.8	17.9	15.0	55.1	42.4
Third-party	mmboe	5.4	4.5	5.2	15.3	15.9
Total sales volume	mmboe	25.2	22.4	20.2	70.4	58.3

Third quarter sales volumes were higher than the prior quarter primarily due to higher domestic gas volumes and the timing of LNG and liquids shipments. LPG sales volumes were lower due to the timing of liftings.

Sales revenues (Santos share)

Product	Unit	Q3 2019	Q2 2019	Q3 2018	2019 YTD	2018 YTD
LNG	\$m	387	341	405	1,163	1,004
Domestic sales gas & ethane	\$m	314	285	272	902	787
Crude oil	\$m	250	211	1872	651	587
Condensate	\$m	64	83	84	226	216
LPG	\$m	15	39	25	62	59
Sales						
Own product	\$m	792	712	724	2,291	1,881
Third-party	\$m	238	247	249	713	772
Total sales revenue	\$m	1,030	959	973	3,004	2,653
Third-party purchase costs	\$m	218	196	197	621	605

Third quarter sales revenues were higher than the prior quarter primarily due to higher average oil-linked LNG prices, higher domestic gas sales, and the timing of LNG and liquids shipments.

Average realised prices

Product	Unit	Q3 2019	Q2 2019	Q3 2018	2019 YTD	2018 YTD
LNG price	US\$/mmBtu	10.04	9.09	10.43	10.00	9.50
Domestic gas price	US\$/GJ	4.07	4.44	4.89	4.35	4.86
Oil price	US\$/bbl	70.20	79.22	81.09	71.37	77.10
Condensate price	US\$/bbl	57.27	66.17	78.78	61.27	73.02
LPG price	US\$/t	386.92	505.92	616.89	467.06	561.57

The average realised LNG price was higher than the prior quarter reflecting the linkage of sales contracts to a lagged Japan Customs-cleared Crude (JCC) price. The average domestic gas price was lower than the prior quarter due the sales mix and FX movements on AUD-denominated domestic gas contracts.

Production by asset (Santos share)

Asset	Unit	Q3 2019	Q2 2019	Q3 2018	2019 YTD	2018 YTD
Western Australia	mmboe	8.6	7.7	2.5	23.5	8.1
Cooper Basin	mmboe	4.0	3.9	4.0	11.7	11.5
Queensland & NSW	mmboe	3.3	3.2	3.1	9.6	9.0
PNG	mmboe	3.1	3.2	3.4	9.5	8.0
Northern Australia	mmboe	0.8	0.6	1.0	2.4	2.7
Asia ¹	mmboe	-	-	1.0	-	3.7
Total production	mmboe	19.8	18.6	15.0	56.8	43.0

¹ Asian assets sold effective September 2018.

Production by product (Santos share)

Product	Unit	Q3 2019	Q2 2019	Q3 2018	2019 YTD	2018 YTD
Sales gas to LNG plant	PJ	32.3	31.6	32.4	96.9	86.0
Domestic sales gas & ethane	PJ	64.0	56.5	40.2	175.5	119.4
Crude oil	000 bbls	1,857.2	2,071.2	1,457.8	5,975.7	4,648.2
Condensate	000 bbls	1,069.1	1,088.6	865.9	3,202.2	2,279.1
LPG	000 t	39.0	36.6	34.5	110.9	106.8
Total production	mmboe	19.8	18.6	15.0	56.8	43.0

Third quarter production was higher than the prior quarter primarily due to higher domestic gas production volumes in Western Australia and higher volumes across the onshore assets and Northern Australia.

2019 Guidance

All 2019 guidance is maintained as shown in the table below.

2019 guidance item	Guidance
Sales volumes	90-97 mmboe
Production	73-77 mmboe
Upstream production costs ¹	\$7.25-7.75/boe
Capital expenditure	\$950-1,050 million

¹ Production cost guidance includes all planned shutdown activity and PNG LNG earthquake recovery costs.

Further detail of 2019 year-to-date capital expenditure, including exploration and evaluation expenditure, is reported in the table on page 10 of this report.

Oil price hedging

2.7 million barrels of oil hedging expired in the third quarter.

The following oil price portfolio hedging positions were in place as at 30 September 2019.

Open oil price positions	2019	2020
Swaps (barrels)	225,000	
Brent fixed swap price (\$/bbl)	US\$63.23	
Re-participating swaps (barrels) ¹	120,000	
Brent fixed swap price (\$/bbl)	US\$67.39	
Brent long call price (\$/bbl)	US\$76.00	
Zero-cost collars (barrels) ²	2,366,000	
Ceiling (\$/bbl)	US\$79.83	
Floor (\$/bbl)	US\$51.35	
Re-participating 3-Ways (barrels) ³		4,180,000
Brent long call price (\$/bbl)		US\$77.64
Brent short call price (\$/bbl)		US\$70.00
Brent long put price (\$/bbl)		US\$55.00

¹ When Brent price is below the weighted average long call price, Santos realises fixed swap price. When Brent price is above the call strike price, Santos realises Brent price less the difference between the long call price and the fixed swap price.

² When Brent price is above the weighted average ceiling price, Santos realises ceiling price. When Brent price is between the floor and ceiling price, Santos realises Brent price. When Brent price is below the floor price, Santos realises floor price.

³ When Brent price is above the weighted average long call price, Santos realises Brent price less the difference between the long call price and the short call price. When Brent price is between the short call price and long call price, Santos realises short call price. When Brent price is below the long put price, Santos realises long put price.

Western Australia

Santos share	Units	Q3 2019	Q2 2019	Q3 2018	2019 YTD	2018 YTD
Sales volume						
Sales gas	PJ	40.3	34.4	13.5	107.3	42.3

Production						
Sales gas	PJ	41.3	35.5	12.9	110.1	40.9
Condensate	000 bbls	399.9	421.2	165.8	1,173.0	473.4
Crude oil	000 bbls	1,073.7	1,208.9	118.3	3,469.6	594.0
Total production	mmboe	8.6	7.7	2.5	23.5	8.1
Capital expenditure	\$million	84	79	11	206	29

Third quarter sales gas production rose to a record 41.3 PJ, up 16% driven by new sales to domestic customers.

Condensate sales volumes were higher than the prior quarter due to higher volumes lifted from the liquids-rich Varanus Island gas fields.

Crude sales volumes were higher than the prior quarter due primarily to the timing of liftings. Production was lower due to natural field decline.

The successful Dorado-3 appraisal campaign concluded in early October with flow tests from the Caley and Baxter reservoirs indicating potential for field production flow rates to be at the higher end of expectations and strongly supportive of progress towards FEED-entry in early 2020.

The test of the Caley oil reservoir was conducted over a 12-hour period and achieved a maximum measured rate of approximately 11,100 barrels of oil per day and 21 million standard cubic feet of associated gas through a 68/64" choke. Production was limited by surface equipment restraints indicating the reservoir has the capacity to flow at significantly higher rates. The oil rate was one of the highest ever from a North West Shelf appraisal well test. The results are very encouraging for development of the shallow-water Dorado field, with the test indicating very high potential flow rates of around 30,000 barrels per day from each single production well in the Caley reservoir. For further information, refer to Santos' ASX release of 8 October 2019.

The test conducted over the Baxter gas and condensate reservoir confirmed excellent productivity and fluid quality. A maximum rate of approximately 48 million standard cubic feet per day of gas and 4,500 barrels per day of associated condensate was achieved through a 60/64" choke, which surpassed initial expectations. As with the Caley test, production was limited by surface equipment restraints indicating the reservoir has the capacity to flow at significantly higher rates. For further information, refer to Santos' ASX release of 23 September 2019.

During the quarter, Santos (50% and operator, BP 50%) was awarded gazettal licence W18-4 (designated WA-541-P) located directly to the west of its existing acreage position in the Bedout Basin.

Cooper Basin

Total production	mmboe	4.0	3.9	4.0	11.7	11.5
Capital expenditure	\$million	78	71	57	208	165

Third quarter gas production in the Cooper Basin was 5% higher than the prior quarter due to a strong operating performance and new gas wells being brought online.

Crude oil production in the third quarter was lower than the prior quarter due to the expected decline from the Watkins field development and fewer oil wells being brought online as a result of planned program phasing.

Thirty-two wells were spudded during the quarter: 16 gas development wells and 16 appraisal wells (12 gas, three oil and one water injector). Of the appraisal wells, eight gas wells and two oil wells were cased and suspended as future producers.

A total of 78 wells were drilled to the end of the third quarter and the Cooper Basin remains on track to drill ~105 wells in 2019.

Studies on horizontal well opportunities were held during the quarter and are ongoing. Execution-ready projects have already been identified, adding to the well inventory list for execution in 2020.

The Moomba South project Phase 1 was successfully completed and is expected to provide a reserve booking at the end of 2019. The final investment decision for Phase 2 is on track, with plans to commence an eight-well development program by year-end.

Queensland & NSW

Total sales gas to LNG plant	PJ	74.6	77.2	70.8	231.0	219.9
LNG cargoes shipped		21	21	20	65	60

¹ Includes LNG produced from GLNG equity gas, Santos portfolio gas and third-party quantities.

LNG production was slightly lower than the prior quarter primarily due to the planned one-month statutory shutdown of LNG train 1 conducted during the third quarter.

Gross GLNG-operated upstream sales gas production increased to 616 TJ/d at the end of the quarter and daily LNG-equivalent run-rates of 6 mtpa continued to be achieved. GLNG remains on track to meet ~6 mtpa annualised sales run-rate including volumes redirected to the domestic market by the end of 2019.

Gross daily production from Fairview was stable at 410 TJ/day at the end of the quarter. Production continues to be supported by a focussed program of development and well optimisation projects.

Continued steady production growth from Roma resulted in gross daily production increasing to 122 TJ/day at the end of the quarter. Production continues to build, supported by growth in both legacy and new development areas of the field. Drilling continues in the Roma East project with 274 wells drilled and 223 wells online.

Gross daily production from the Scotia field was 74 TJ/d at the end of the quarter. Production from the field is projected to remain stable.

Production from the Arcadia field grew to 10 TJ/d by the end of the quarter. First gas from the new Arcadia compression facility commenced the quarter, with completion of the facility ahead of schedule. Production is now building, with

growing contribution from the new Arcadia Valley wells. Drilling continues in the Arcadia Valley project with 104 wells drilled and 58 wells online to date.

Santos' share of production from the non-operated Combabula and Spring Gully fields was 44 TJ/day.

Ninety-seven wells were drilled across the GLNG acreage in the third quarter. A total of 286 wells have been drilled to the end of Q3 and the drilling pace remains on track to deliver 350-400 wells by year end. Fifty-one development wells were drilled across Santos' non-operated Eastern Queensland acreage in the quarter.

In Eastern Queensland, two exploration coreholes in ATP 685 (Yoorooga East 1 and Tardrum 5) were cased and suspended for further evaluation. Two further appraisal wells, Wodonga 1 in ATP 868 and Warrinilla 9 in PL 451 were cased and suspended for further testing.

¹ Measured at the Kutubu entry point.

² Purchased by PNG LNG.

Third quarter production was lower than the corresponding period primarily due to damage of the loading buoy at the Kumul Marine Terminal in late August. As a result, PNG LNG production was managed at reduced rates to prevent a potential shut-down should liquids storage capacity be reached. A return to near full production rates was achieved in mid-September due to modified liquid lifting procedures and repairs to the loading buoy were completed mid-October.

Notwithstanding the reduced production rates, the PNG LNG plant still operated at an annualised rate of 8.3 mtpa during the third quarter.

Long term pressure build-up monitoring continues at the Muruk-2 appraisal well. As previously reported, results from the drill stem test confirmed the presence of gas in the Toro A reservoir with pressure data and gas composition informing volumetric estimates and establishing a likely connection to the Muruk-1 discovery.

Sales and production volumes were higher than the prior quarter due to timing of the LNG shipping schedule and the completion of planned maintenance activities at Darwin LNG in the second quarter.

On 14 October, Santos announced the acquisition of ConocoPhillips' interests in Northern Australia for US\$1.39 billion plus a contingent \$75 million on Barossa FID. This is a value accretive acquisition of operating interests in long-life, low cost natural gas assets and strategic LNG infrastructure consistent with Santos' core asset growth strategy. The acquisition is fully-funded from existing cash resources and new committed debt. Completion is subject to third-party consents and regulatory approvals. For more information on the acquisition, refer to Santos' ASX release of 14 October 2019.

The Barossa project continues to make excellent progress towards a final investment decision in early 2020. On 26 September, Santos announced the award of the Barossa gas export pipeline contract to Allseas Group. This follows the award of the Subsea Production System (SPS) contract earlier in the year to Technip Oceania Pty Ltd. Evaluation of tenders for the FPSO, SURF (subsea umbilical riser and flowline package) and drilling rig are progressing well.

In the onshore Amadeus Basin in the Northern Territory, the Dukas-1ST1 wildcat was plugged and suspended in August. The well was targeting a conventional sub-salt play and was suspended at a depth of 3,704 metres after encountering higher than expected pressures.

Approvals from Northern Territory regulatory authorities for the planned McArthur Basin 2020 drilling campaign are progressing. The 2019 program is likely to comprise the hydraulic fracture stimulation and testing of the Tanumbirini 1 well, which was cased and suspended in 2014. Subject to regulatory approvals, this activity is scheduled for the fourth quarter.

Corporate, exploration and eliminations

Santos share	Units	Q3 2019	Q2 2019	Q3 2018	2019 YTD	2018 YTD
Total sales volume	mmboe	1.0	0.9	1.2	3.1	3.7
Total sales revenue	\$million	49	42	37	146	160
Capital expenditure	\$million	24	19	6	47	29

Sales volumes and revenues in the corporate segment primarily represent gas trading activities.

Capital expenditure was higher than the prior quarter primarily due to the drilling of the Dukas-1 exploration well in the Amadeus Basin, onshore Northern Territory and progressing approvals for the planned McArthur Basin drilling campaign.

Capital expenditure

Total exploration, evaluation and development expenditure is summarised in the table below.

\$million	Q3 2019	Q2 2019	Q3 2018	2019 YTD	2018 YTD
Capital expenditure					
Exploration ¹	59	13	14	90	52
Evaluation	46	86	34	147	57
Development and other capex (inc restoration)	163	172	132	478	378
Capital expenditure excl capitalised interest	267	271	180	715	487
Capitalised interest	1	3	1	6	3
Total capital expenditure¹	268	274	180	721	490
Exploration and evaluation expensed					
Exploration	54	17	13	78	49
Evaluation	3	0	4	6	13
Total current year expenditure	57	17	17	84	62
Write-off of amounts capitalised in prior years	-	-	-	-	-
Total expensed	57	17	17	84	62

¹ Includes acquisition of exploration assets

Seismic activity

The table below details seismic activity during the quarter and status.

Permit	Basin/area	Survey	Type	km/km ²	Status
WA437P, WA438P	Bedout, WA	Keraudren	3D	2,140 km ²	100% complete
ATP2017	Bowen, Qld	Tinowon	2D	30 km	100% complete
EP161	McArthur, NT	McArthur	2D	10 km	100% complete
