In 2019, Santos supplied **20%** of Australia's domestic gas

Santos is the **largest** domestic gas supplier in Australia

A proudly Australian natural gas company

Santos is Australia's leading supplier of natural gas.

For more than 65 years, Santos has been working in partnership with local communities to provide jobs and business opportunities, and to safely and sustainably develop Australia's natural gas resources.

Santos' origins lie in the Cooper Basin, which spans the borders of northeast South Australia and southwest Queensland, where we made our first commercial natural gas discovery in 1963.

Our operations have expanded to include five core assets: Western Australia, the Cooper Basin, Queensland and New South Wales, Northern Australia and Timor-Leste, and Papua New Guinea.

Across these assets, we operate numerous plants, facilities and pipelines to deliver our natural gas, liquefied natural gas (LNG) and oil products to customers.

Santos is focussed on being the safest, most reliable and lowest cost developer and operator in Australia and this is reflected everything we do.

From providing jobs and supporting local manufacturers, to heating your home and firing up your barbecue – Santos' natural gas is part of Australia.

Since 1969, Santos' Moomba plant has been supplying natural gas to Australian homes and businesses.

Did you know

Natural gas is an abundant, reliable and low-cost energy source that has been used in Australia for over 100 years. It is a base material in many everyday items including medicines, electronics and clothing.

About Santos

How we operate

Santos is dedicated to being the safest, most reliable and lowest cost operator in Australia, and preventing harm to people and the environment. We work with local businesses and other organisations to listen, support, create jobs and build skills for the future.

A sustainable future depends on Australian natural gas, and Santos is playing an essential role in securing Australia's economic, environmental and energy security for years to come.

We are committed to being part of the solution to a lower-carbon future by limiting greenhouse gas emissions while providing access to reliable and affordable energy to domestic and global markets.

To that end, we are investing in initiatives such as carbon capture and storage (CCS) and hydrogen technologies.

Santos is committed to partnering with and being trusted by local communities so they can benefit from the development of natural gas resources. In 2019, we supported over 140 community organisations, including sporting clubs, schools and not-for-profits.

Santos is passionate about building a better future. We collaborate with Indigenous Australians on initiatives to improve lives and opportunities, including programs like the Aboriginal Power Cup, where football is used as a youth development platform.

What we do

Our operations are based around five core long-life assets:

Santos works to safely and sustainably explore, develop, produce, and market natural gas and oil products from our operations. These resources are then used to power homes, businesses, appliances, and vehicles, and as a feed ingredient for manufacturing industries.

Our values

The Santos values are embedded in everything we do.

Work as one team

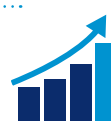

Always safe

Act with integrity

Be accountable

Pursue exceptional results

Build a better future

Santos
