

Invoicing Guidelines - Bayu-Undan Services

Applicable to services performed from 30 August 2019 onwards

Santos NA (19-12) Pty Ltd (STO) is required to submit all relevant taxes to both the Australian and Timor-Leste governments. Sufficient information must be provided on invoices to allow calculation of such taxes.

General Information

The following general information must be provided for the invoice to be tax compliant and to assist with referencing payment in the STO systems.

- Invoice number
- STO Purchase Order number
- STO Contract number
- Australian Business Number (ABN) - where applicable
- Timor-Leste Tax Identification Number (TIN) - where applicable (PE only)

All claims for services must also be accompanied by appropriate back-up documentation which is duly authorised by the relevant STO representative. For example;

- * Labour hours - a timesheet signed by the STO supervisor
- * Equipment rental - a copy of the delivery docket from equipment pick-up and equipment return
- * Other expenses - copies of the third party receipts and appropriate authorisation

Tax Information

The following detailed information is required to calculate the correct taxes and charges. *In addition, the level of detail for each item and the relevant rate must match the STO purchase order and align with the agreed contract rates.*

1. VAT

- All invoice items subject to VAT must be separately identified and the total amount of VAT shown
- For non PE contractors the amount subject to VAT will also be the amount subject to WHT
- VAT does not apply to services performed on Timor Mainland / Onshore

2. GST

- Any items subject to GST need to be separated and the total GST charge calculated (10%)
- Where GST is invoiced in foreign (non-AUD) currency, the exchange rate used for converting the GST into AUD must be specified or the equivalent AUD amount also shown on the invoice.

3. Tax Free Items

- Any items that are both VAT & GST free need to be separately identified

All items (charges) on the invoice must be categorised into the three sections listed above to enable STO to process the invoice.

4. WHT

- The applicable WHT rate must be displayed on the invoice
- Where the contractor does not have a PE this rate will generally be 7.2%
- Where the contractor does have a PE the appropriate rate to be used must be shown
- Where the contractor does have a PE any WHT free amount must be shown separately on the invoice. If this is not done the total "gross" value is assumed subject to WHT.
